EcoCalc

EC707

Large Desktop Calculator

Recycled Plastic
Recycled plastic used in production. The reduction in use of new plastics leads to less petroleum being used in production which reduces the environmental impact.

Recycled Packaging
The packaging and instruction manual use over 90% recycled paper. The reduction in use of new paper helps to sustain precious forestry resources and again further reduces the environmental impact.

ISO 14001 Certified
Our production process has been independently certified and complies with the Environment Management System ISO14001. This means we have taken steps to minimize our environmental impact and are committed to continual improvement of our environmental performance.

WEEE Compliant
Our environmental commitment means we operate an 'end of life' recycling scheme, all our products are designed to be recycled and we are part of an official WEEE Recycling Scheme. This means end of life products will no longer enter the general waste system, but instead will be recycled again, reducing the environmental impact further.

RoHS Compliant
All our products are free from lead, mercury, cadmium and other toxic substances in accordance with the RoHS directive. This ultimately reduces the risk of such chemicals entering our waste and water systems and improves recyclability.

Zero Air Miles
Our transportation commitment is that the Eco Range will never be transported by air. All international transport of this range will take place by sea, a much greener alternative to air transport. Transportation accounts for a large percentage of global emissions, by restricting transportation methods in this way we further reduce the impact to the environment.

No Battery
Most calculators even solar powered ones still contain a battery. The new EcoCalc models operate entirely from a new high powered solar cell and require no additional battery, thus further reducing their impact on the environment.

Greener Office Solutions from Aurora

The new EcoCalc range combines outstanding business and office calculators with a greener manufacturing process and reduced carbon footprint.
For the first time **Quality, Value and Environmental Benefits** have been combined in one product range, EcoCalcs provide the ideal solution for any organization looking to implement a greener procurement policy and reduce their own environmental impact.

Easy Viewing and Simple Operation

An extra large 12 digit angled display, large well spaced keys and large clear numerals ensure ease of use.

Unique Features that Improve Efficiency

The patented large 'equals' bar is easier to use and improves speed of use significantly, whilst the Direct Number Input feature allows the calculator to be turned on by simply pressing any key, this again speeds up usage and improves efficiency.

Business Features Provide Increased Functionality

The Cost/Sell/Margin feature allows the user to easily calculate profit margins, suggested selling prices and required cost prices.

Solar Only Powered Using Greener Solar Energy

Solar Only power means no need for a battery.

Additional Calculator Features

- Backspace correction
- Decimal selector
- Double zero
- Square root
- Auto power off
- 3 key memory,
- Rounding
- Percent
- Sign change key
- Dimensions 128x180x31mm
