How to use a Wrist Support

- 1. Mouse position:** Place your mouse and mousepad/flex rest in line with your shoulders, or as close to your keyboard as possible to avoid tension in the arm and shoulder (or so your arm is relaxed by your body)
- 2. Keyboard position:** Place your keyboard/rest close to you so you do not need to reach forward
- 3. Arm position:** Check your sitting height to ensure your forearms are horizontal and your wrists are in a neutral position when mousing or typing.
