

GBC Combbind C20 Binding Machine

4400311

Overview

Simple, Intuitive And Productive, The GBC Combbind C20 Is Ideal For Moderate Use In The Mid Size Office. It Features The Unique Quickstep Workflow Guide To Lead Users Instinctively Through The Whole Process, Enabling Novices And Expert Binders Alike To Achieve Perfect Results Every Time.

Description

With a punch capacity of up to 20 (80gsm) sheets and a binding capability of up to 330 pages, the GBC CombBind C20 is the ideal shared binding solution for the medium sized office with moderate volume needs. From larger training manuals and everyday reports to client proposals, this manual puncher and comb binder enables you to create professional, editable documents of A4 or US letter size.

The CombBind C20 is simple and intuitive to operate thanks to the unique QuickStep WorkFlow Guide that leads users instinctively through the whole process using colour

coding and images. It removes all the frustration from the binding process, enabling novices and expert binders alike to achieve perfect results every time.

There's a handy colour-coded stack height guide, for example, so you can quickly check document thickness and select the correct size of comb for the number of pages you are binding, up to a maximum of 38mm for 330 sheets. A neat locator arrow ensures you align the comb accurately for binding to eliminate time-consuming mistakes.

The CombBind C20 incorporates low punch force technology which makes punching up to 20 sheets at a time smooth and quick. The vertical punch makes it easier to align paper accurately whilst the gravity-fed 'paper fall' mechanism improves productivity. And an easy-access chip tray tidily collects the paper waste from the punching process for mess-free disposal.

With the CombBind C20 it's so simple to create stylishly bound documents quickly and efficiently and improve productivity by up to 20% to ensure you stay on top of your workload. It comes with a 2 year parts and labour warranty, so you can purchase with confidence. Why not combine with new colour coded GBC ProCombs for maximum productivity?
