

# WHOEVER SAID SKY IS THE LIMIT?

**Mobile Performance for High-Flyers:** In any industry, downtime is a productivity killer. HMD Skyline Business Edition keeps you going strong with performance fueled by the SNAPDRAGON® 7s GEN 2 MOBILE PLATFORM and a long-lasting battery. And because you can charge it wirelessly with any Qi2 compatible charger, your team can stay powered up and focused, no matter what obstacles come your way.

**Repairability Simplified:** Business is a fast-paced world – and mishaps happen. Dropping your phone and picking it up to see that dreaded crack on the screen? Been there. But with HMD Skyline Business Edition and its Gen2 repairability, making that fix is a breeze.<sup>1</sup> Your team can just pop off the back cover, remove some screws, and replace the screen, all in the time it takes to get a cup of coffee. Voilà! Good as new, and you're back in business.

**Invest in Long-term Security:** When you choose HMD Skyline Business Edition, you're investing in long-term peace of mind. Enjoy 5 years of security updates<sup>2</sup> and a 3-year warranty, minimizing risks and ensuring uninterrupted business operations. Sit back and relax knowing that your investment is safeguarded against unforeseen tech challenges.

**Door to Door Care with DHL Express:** Need a helping hand to get those repairs sorted? From anywhere in Europe, just schedule a pickup, and we'll take care of the rest, ensuring swift, hassle-free repairs right from your doorstep, keeping your business running smoothly.

<sup>2</sup> From the global launch date of HMD Skyline Business Edition <sup>3</sup>5G coverage is limited and might not be supported by your network service provider. Actual speed depends on network and other factors. <sup>4</sup>Pre-installed system software and apps use a significant part of memory space. <sup>5</sup>Battery has limited recharge cycles and battery capacity reduces over time. Eventually the battery may need to be replaced. <sup>6</sup>Battery has been tested by HMD Global to maintain at least 80% of its original capacity after 800 full charging cycles. <sup>7</sup>Battery testing was conducted by HMD Global Oy using a real-life usage test. Testing included cycles combining 30 minutes of active usage and 2 hours of idle time with a new battery, starting from 100% battery charge until the device powered off. Usage included e.g. gaming, video streaming, video playback, calling, browsing, and data transfer. Testing was conducted with normal device settings in a lit indoor environment.
