

## Aero Flip Power Module

Aero Flip in desk power module is perfect for your boardroom table, available in a variety of configurations providing you with power, data and media connections

Step 1

Position the Aero Flip over the designated hole within the desk and lower the unit (including the wire) until the embraces are flushed within the top surface

Step 2

Lock the Aero Flip in place by pushing up the ratchets from the underside of the table

Step 3

Plug Aero Flip into mains socket and begin use

Individually fused with 5A or 3.15A sockets

Spare fuse in each socket

GST-18

Available in white, grey or black

Sloping edge design ensures cables run flat and smoothly on exit
