

CK58 Class Pack

AX-582BL

- TrueLogic® Algebraic Entry
- 2 Line LCD display
- A total of 240 functions
- Slide on protective plastic case
- Screw fixed battery cover

The CK58 is a convenient class pack of 30 x AX-582BL calculators packed into a Gratnells extra deep storage tray, it includes a foam stacking insert that holds the calculators securely and allows for easy stock checking when distributing or collecting the calculators. There is also a clear plastic lid for secure transport and to protect the calculators during storage. The Gratnells storage tray is compatible with Gratnells' storage systems commonly used in schools.

The AX-582BL calculator has a twin line LCD that displays both the sum and answer and a multi-replay function that allows you to scroll back through previous calculations and edit them. Add to this a total of 240 different maths and scientific functions and you have a great calculator ideal for Key Stages 3&4.

The CK58 is a great class pack of exam compliant scientific calculators that can be distributed to the whole class or used as an ideal back up set of calculators during examinations.
