Ergonomic Working:

Fellowes **ZONE 1** PREVENT BACK TENSION

Support your back.

A seat cushion, foot rest or back support helps you achieve the correct posture.

How to use a back support

- 1. Lumbar supports:** These should fit in the inward curve of your lower back - about waist level.
- 2. Full back supports:** Ensure the support is positioned so it fits the inward curve of your lower back and supports your upper body.
- 3. Seating position:** Sit just off upright, so you feel that you are supported by the backrest with your shoulders relaxed. Ensure your seat height is set so your arms are parallel with your desk and your elbows are roughly at a 90° angle. Knees should be level or just lower than your hips with your feet firmly supported on the floor.
- 4. Support your feet:** Don't forget to use a foot support if you can't place your feet firmly on the floor or want to add movement to your day.

Certifications:

EN ISO 9241-5 1999 Ergonomic requirements for office work with visual display terminals (VDT's): part 5: 1999, workstation layout and postural requirements.

Aftercare:

Cleaning: Covers handwash and air dry only. Do not bleach.

Handling & Storage: Read and follow all instructions and warnings before use. This product is intended for indoor use only.
