

## Give a second life to used cartridges with ValueX cartridges!

All our ValueX cartridges for HP printers are remanufactured. Remanufactured cartridges are cleaned and refurbished to be able to be used again for another printing cycle.

All the worn parts are replaced and the toner is refilled to give you an optimal performance while minimising your impact on the environment.

Our remanufactured cartridges provide the same quality as the OEM cartridges and come with a lifetime warranty!

We create a sustainable business by ensuring that we operate responsibly.
